CAS INDEXING IS AVAILABLE FOR THIS PATENT.

AB Some otherwise desirable oil compositions derived from natural sources are characterized by an unpleasant odor. Fractions or combinations of such oils may also be so characterized. Stable, deodorized oils may be prepared by adding an amount of a deodorizing agent effective to substantially reduce the odor of the derived oil composition, fraction or combination thereof to that oil composition, fraction or combination. The pharmaceutical topical compositions of the present invention contain these stable, deodorized oil compositions and exhibit enhanced penetration properties and achieve enhanced patient response. The improved pharmaceutical compositions of the present invention may be used to manage pain and/or to treat the underlying ailments. Methods of making such topical pharmaceutical compositions are also discussed.
